If a valid medical certificate is not already present in the RUNCARD database at 31/12/2019, the medical certificate will be checked through the DataHealth service; therefore it is necessary that the medical certificate required under this regulation has been taken uploaded and validated, through the DataHealth service (www.datahealth.it), at least 10 day before the races.

The medical certificate issued in their own country must comply with all diagnostic tests prescribed by Italian law – see below:

Medical examination - Complete Urinalysis - Electrocardiogram at rest and after exercise - Spirometry. All statements and the reports of the examinations must be authentic, or the originals.
